

Allmicroalgae

Exceptional Microalgae for Natural Beauty.

microalgae

Due to its composition rich in amino acids, antioxidants, chlorophyll, betacarotene, vitamins and phytonutrients, microalgae are a source of many beneficial products in different sectors: human and animal nutrition, agriculture, aquaculture and cosmetics, among others. In cosmetics, numerous formulation concepts are possible, from soaps to shaving creams, shampoos, dyes, lipsticks, toners, makeup products, foams and others.
